Assignment Content
1. [Github Repo Link](#)

2.The MVP has been completed, with all CRUD operations functioning as required. I have addressed the feedback from the instructor, ensuring that any issues or areas for improvement were corrected.I did not extend the MVP since I wanted to keep it error free and simple.Basic login & Signup functionality has been implemented, allowing users to sign in and access restricted areas of the application. However, the administrative feature hasn't been set up. The README file in the GitHub repository is well-documented, with instructions to run the projects, and key features. It provides clear guidance for anyone wanting to understand or contribute to the project.

3.This project has helped me to understand the pattern of MVC's, the web api controller with actions and how relationships are explored between entities. A significant challenge I faced was integrating the relationships between my entities and some aspect of the CRUD funtionality. I faced multiple challenges but I overcame this by thoroughly researching online.Well, this project development aligned closely with my original plan, though I had to make some adjustments along the way due to some complex challenges. If I were to work on a similar project again, I would dedicate more time to planning the architecture, to avoid the difficulties I encountered.
